

Joseph Bentley

Profile

A passionate junior software developer looking to secure my first role as a professional software developer.

From an early age I developed a keen interest in computing both hardware and software and this has continued to the present day, leading to a desire to progress and boost my knowledge in software development. I started to work through some online courses which sparked my enthusiasm for learning to code. I found myself creating personal side projects to apply the skills I had learnt.

I decided to attend a 12-week immersive learning experience through Code Nation. I knew that this would equip me with the relevant skills I needed to make the step into the sector as a junior developer. The course covered a full stack curriculum including, JavaScript, HTML, CSS, React, Python, Django, MongoDB, MySQL, Node.JS. Throughout the course we also covered the additional training required by the sector to be successful including lightning talks, stand up's, retros and introduced to Git and industry methodologies.

Most recently I have developed additional skills and an understanding into software testing, with focus on Jest. I have also been learning about Software development lifecycles and gained a thorough understanding of the Agile Manifesto and its methodologies.

Employment History

Dance Captain

Marella Discovery | January 2019 - February 2020

My third professional dancing contract working for PEEL Entertainment, undertaking the role of Dance Captain. I was responsible for leading team rehearsals, motivating and uplifting the performers to deliver the highest quality product and in doing so securing the highest customer survey results of the season.

Showteam Leader

Marella Discovery | 2017 - 2018

My second professional dancing contract working for PEEL Entertainment where I led a high performing team through a successful 12 month contract, gaining the highest customer survey results for the entire fleet. Both administrative and functional leadership combined with organisational effectiveness including team mentoring and support.
